Dindigul – 624619

Profile Summary

Embedded Systems and IoT Developer skilled in microcontroller programming, sensor integration and hardware-software interfacing. Experienced with Arduino, RFID modules, ESP devices and IoT automation projects. Strong problem-solver with hands-on project experience in embedded design and real-time systems. Passionate about automation, circuit design and embedded technology innovations.

Technical Skills

Programming: Python, C, Java

Libraries: NumPy, Pandas, Adafruit ESP8266, AnalogRTCLib

Tools: GitHub, VS Code

Soft Skills: Problem Solving, Team Collaboration, Quick Learning

Projects

Smart Home Automation Using IoT

Jan 2025

- Built an IoT smart home system with cloud-controlled appliances and sensor automation.
- Enabled remote monitoring, energy control and safety automation.

Cell Phone Controlled Robotic Vehicle

May 2025

- Developed a Bluetooth-controlled robotic vehicle using Arduino and motor drivers.
- Implemented directional movement control via mobile commands.

Library Automation Using RFID

Jul 2025

- Designed an RFID-based system automating book issue and return processes.
- Improved accuracy and reduced manual effort in library operations.

Internship

Embedded Systems Intern — CodTech IT Solutions

Aug 2025

- Worked on embedded programming, IoT device control and sensor-based automation.
- Hands-on experience with microcontrollers, ESP modules and real-time embedded systems.

Certifications

- Generative AI in Action — IBM SkillsBuild (2025)
- Embedded System with IoT — Skill Intern (2025)
- Arduino Project (Basic) — Simplilearn SkillUp (2025)
- Technology Job Simulation — Deloitte Forage (2025)

Education

B.Tech in Information Technology

2022 – 2026

Christian College of Engineering and Technology, Tamil Nadu
